

COVID-19 SITUATION REPORT # 2

CHAMP ♦ North Central ♦ Northeast Florida Healthcare Coalitions
Saturday, March 28, 2020

| Current COVID-19 NUMBERS BY COUNTY (3/26 11 am) | | | |
|---|-------------|------------------|--------|
| | Total Cases | Hospitalizations | Deaths |
| Alachua | 64 | 7 | 0 |
| Baker | 7 | 7 | 0 |
| Bradford | 1 | 1 | 0 |
| Clay | 24 | 12 | 4 |
| Columbia | 3 | 0 | 0 |
| Dixie | 0 | 0 | 0 |
| Duval | 109 | 22 | 3 |
| Flagler | 12 | 1 | 0 |
| Gilchrist | 0 | 0 | 0 |
| Hamilton | 0 | 0 | 0 |
| Lafayette | 0 | 0 | 0 |
| Levy | 1 | 0 | 0 |
| Marion | 16 | 1 | 0 |
| Nassau | 6 | 1 | 0 |
| Putnam | 12 | 0 | 0 |
| St. Johns | 46 | 11 | 2 |
| Suwannee | 1 | 0 | 0 |

*FDOH updates data at approximately 12 pm & 7 pm

Statewide Conference Call Summaries

Key points from State Surgeon General Rivkees, AHCA Secretary Mayhew, DEM Director Moskowitz and others are included below

- In Florida, COVID testing has resulted in a 8.7% positive rate. National rates average 14% with some areas up to 30%
- The Florida Department of Health is closely monitoring the trends. If they begin to see this rate go up, then current mitigation measures may need to be adjusted.
- There is currently capacity in the statewide healthcare system (approximately 20,000 hospital beds available. FDOH is using modeling to predict when areas in Florida may begin to exceed the healthcare capacity. With the current trends and data collected from ESS, capacity is stable through late-April or early-May.
- All reporting facilities must keep ESS data up to date so that the models have the best available data to assist with accurate model projections. Florida's data collection and modeling exceeds the capabilities of most states.
- The State is emphasizing to stop all elective surgeries. This is being done to conserve PPE.
- Sec. Mayhew signed an order allowing LTC workers to be hired using a level 1 background check where finger printing may be unavailable. Goal is to add more workers to the sub-acute level of healthcare, and to maintain the acute level of the healthcare workforce.
- Continue to follow guidance to optimize the use of PPE. Nebraska Medicine has developed a process to use UVGI process to decontaminate and reuse N95 respirators. <https://www.nebraskamed.com/sites/default/files/documents/covid-19/n-95-decon-process.pdf>

Healthcare Staff Traveling During Curfews

Some areas of the state may begin establishing curfews for residents. Your facility staff should prepare now by having their work badge or letter from the facility, a form of identification and the [FDOH Letter to Law Enforcement](#) in their vehicle at all times to ensure their ability to travel to/from the workplace.
