Statewide Conference Call Summaries

Key points from State Surgeon General Rivkees, AHCA Secretary Mayhew, DEM Director Moskowitz and others are included below

- Text alert went to all Florida citizens last night (3/28/2020) telling everyone over 65 to stay home, shelter in place
- This alert was intended for the general public. Healthcare workers and first responders over 65 should follow their individual company's policy
- ESS data is being used to make critical policy decisions, on the state level. Please keep ESS data updated regularly
- Hospitalization rate is about 13% of positive cases. Cases are increases because of the increases in testing capabilities
- Using currently models from University of Washington, COVID-19 should peak in Florida around mid-May. Models may change as more data is refined
- FDOH is working on procurement of point-of-care COVID-19 test. More information to come
- Many anesthesiologist machines can be used as ventilators to potentially add to facility ventilator capacity. Check with your anesthesiologist at your facility
- FDOH is working with the Ambulatory Surgical Center Association and AHCA on a guidance packet on converting an ASC into surge ICU beds. Contact your county EOC if your facility may be used for hospital surge space
- FRAUD! There is a lot of fraud right now in the PPE Market. Beware of companies that can't provide dates or specific information or that require wire transfers of funds.

Healthcare Staff Traveling During Curfews

Some areas of the state may begin establishing curfews for residents. Your facility staff should prepare now by having their work badge or letter from the facility, a form of identification and the [FDOH Letter to Law Enforcement](#) in their vehicle at all times to ensure their ability to travel to/from the workplace.
