

# COVID-19 SITUATION REPORT # 59

CHAMP ♦ North Central ♦ Northeast Florida Healthcare Coalitions

Wednesday, July 29, 2020

Current COVID-19 NUMBERS BY COUNTY (7/29 @ 4:00 pm)			
	Total Cases Residents/Non-Residents	Hospitalizations* Residents/Non-Residents	Deaths Residents
Alachua	3,353 (3304/49)	137/11	20
Baker	329	25	4
Bradford	307	25	3
Clay	2,697 (2688/9)	180	47
Columbia	2,323 (2315/8)	93	10
Dixie	241	25	4
Duval	20,398(20183/215)	594/14	149
Flagler	850 (840/10)	73/2	10
Gilchrist	334	11	2
Hamilton	564 (559/5)	20	3
Lafayette	95	8	1
Levy	509 (506/3)	28	2
Marion	4,314 (4302/12)	373	55
Nassau	1,009 (956/53)	58	8
Putnam	1,223	137	15
St. Johns	3,136 (3104/32)	156/5	23
Suwannee	1,060 (1043/17)	90	32
Union	200	18	4
Statewide	451,423 (446,251)	25,499	6,333

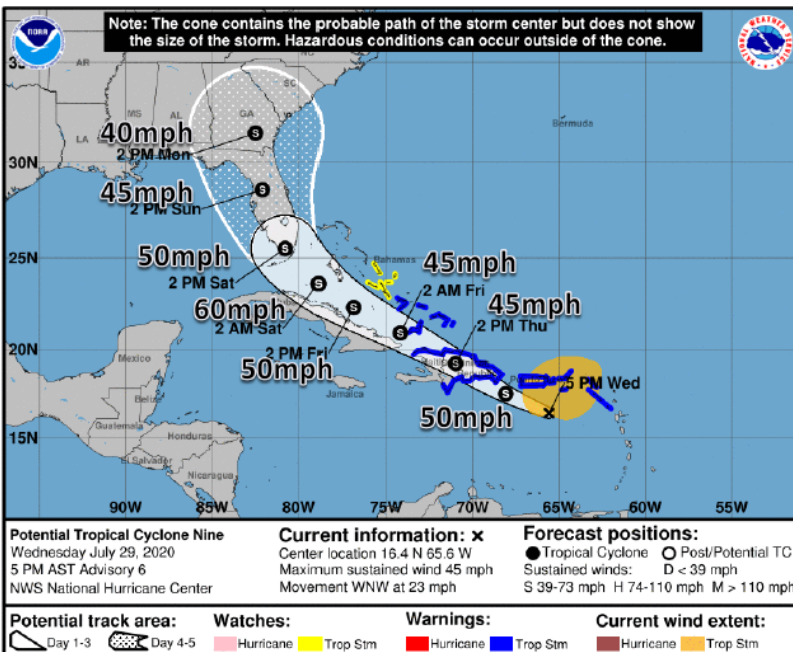

Current COVID-19 TESTING BY COUNTY (7/29 @ 4:00 pm)			
	Total Tested	Total Positive	Positive Rate
Alachua	64,622	3,353	5.2%
Baker	4,083	329	8.1%
Bradford	3,926	307	7.8%
Clay	31,020	2,697	8.7%
Columbia	11,986	2,323	19.4%
Dixie	2,333	241	10.3%
Duval	188,599	20,398	10.8%
Flagler	13,248	850	6.4%
Gilchrist	3,359	334	9.9%
Hamilton	3,822	564	14.8%
Lafayette	849	95	11.2%
Levy	5,512	509	9.2%
Marion	41,914	4,314	10.3%
Nassau	13,448	1,009	7.5%
Putnam	11,174	1,223	10.9%
St. Johns	36,344	3,136	8.6%
Suwannee	6,597	1,060	16.1%
Union	3,186	200	6.3%
Statewide	3,531,21	451,423	12.78%

FDOH updates data daily at a 11:00 am \*Hospitalization includes persons that may no longer be hospitalized.

**Continue to monitor the potential for a storm this weekend.**

## Official Forecast Track

From the National Hurricane Center – PTC #9

- The center of Potential Tropical Cyclone Nine is estimated to be about 320 miles east-southeast of Santo Domingo, Dominican Republic.
- Maximum sustained winds are around 45 mph.
- Potential Tropical Cyclone Nine is racing to the west-northwest at 23 mph, and a west-northwest movement is expected over the next few days
- The system will likely make landfall on Hispaniola Thursday morning, then move near or over Cuba Friday, and approach the Florida Keys on Saturday
- There is an equal chance of the system passing to the west over the Gulf of Mexico, over the Peninsula, or to the east of the Peninsula over the Atlantic. Considerable uncertainty remains.
- NHC's intensity forecast accounts for the center being over land. However, if the center is offshore, the actual intensities may differ.

## AHCA's LTC Transfers & Testing Updates

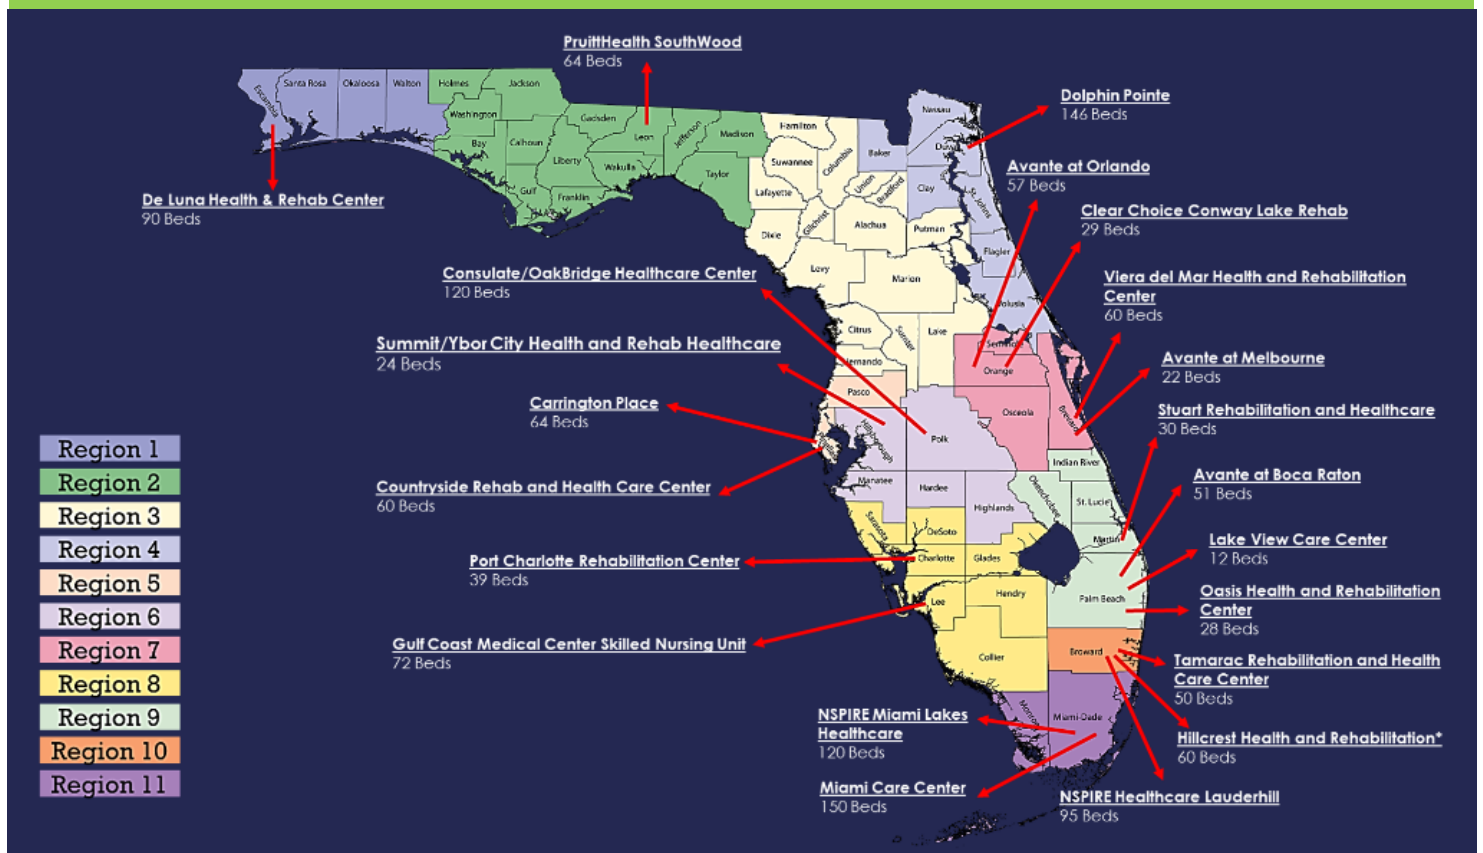

[Alert released July 20, 2020](#)

**\*UPDATED\* Regional COVID-19 Isolation Centers \*More sites added statewide\***

[https://ahca.myflorida.com/covid-19\\_inf.shtml](https://ahca.myflorida.com/covid-19_inf.shtml)

Map & list with links found on website above along with more details about these centers.

The State is working to open more Isolation Centers, so continue to monitor the website above.

## **\*NEW\* More Statewide Conference Calls Added \*NEW\***

### Statewide Conference Calls

Coalition staff attends the following statewide calls and provides the daily summaries and highlights above.

Hospitals & FHA	Tuesday & Thursday 10:00 am	888-585-9008 Code 488 097 156#
Behavioral Health Centers	Tuesday 10:45 am	888-585-9008 Code 208 305 233#
Healthcare Providers	Tuesday 5:30 pm	888-585-9008 Code 208 305 233#
Home Health & Community Providers	Thursday 1:00 pm	888-585-9008 Code 208 305 233#
Nursing Homes & FHCA (recorded & posted)	Thursday 4:15 pm	866-951-1151 Room ID 8484844#

### Conference Call Highlights

- FDOH reminds all providers that all COVID test results must be reported. This includes positive and negative results.
- Convalescent Plasma therapy has efficacy. All COVID + patients are encouraged to donate plasma 14 days after being infected.
- CDC Guidance for Healthcare Personnel to return to work ([Updated 7/17/2020](#)).
- CDC Guidance for Symptom-Based Strategy for Discharging Patients ([Updated 7/17/2020](#))
- Regional collaboration and level of engagement between clinicians, hospitals and long-term care facilities continues to be a strength and is the silver lining from this response.
- There are 22 Isolation Centers, 1400 beds, and more are under consideration. Memory care patients will need to have appropriate caregivers, if admitted.
- Email questions to [provider.COVID19@FLHealth.gov](mailto:provider.COVID19@FLHealth.gov)
- As we enter the busiest part of hurricane season, it is critically important to have your hurricane plans, vendors and supplies in place.

## After Action Review

### Starting your After Action Review Process for COVID-19

#### Steps your facility/organization should take now, while the COVID response is still ongoing:

1. Designate a person to lead your organization through the AAR process. If not a senior leader, then someone that has access to the senior leadership. Identify key individuals that will need to be involved and engage them now.
2. Develop an incident timeline. This involves listing your organization's actions in time order, to see what happened when. Consider including major events that impacted your organization as well, such as stay-at-home orders or a ban on elective procedures. Here are two examples from the [WHO](#) (COVID-19) and [CDC](#) (SARS).
3. Take detailed notes on the operational and leadership actions taken during each time segment. Remember, observations are much more reliable than memories. Have key staff keep track of their response actions, outcomes and challenges throughout the response. Some organizations use the [ICS-214 form](#), but any uniform process established to capture activities is important.
4. Develop a process to collect this information regularly. One recommendation is to collect the ICS-214s at the staff sign-out/check-out station. This information will be invaluable to your leadership as you begin to change process, policies and organizational culture.
5. Consider conducting frequent, but brief, AAR sessions. This is a long response and things change over time. In these brief sessions discuss things that are going well and areas that may need improvement. Take detailed notes during these sessions. These brief AAR sessions may assist in making incremental changes to processes or large policy changes to improve the ongoing response.
6. Document everything! Remember this important rule: If it is not written down, then it didn't happen.

Analyzing Response and Root Cause Data. This can be done in phases or at the end of the response.

Next in the After Action Review (AAR) process, is evaluating all the information collected during the response, either by phase or the entire event, using the incident timeline.

As you review the information collected, for the actions taken during the response, compare the organization's actual performance with the current processes, policies, goals and objectives.

During this analysis, identify the actions that worked well and those that may require improvement. For actions that did not work well, a root cause analysis may assist in determining the underlying reason behind an identified issue or challenge. When conducting a root-cause analysis, you are attempting to trace the origin of each event/issue back to earlier events and their respective causes. It requires asking "why", multiple times, to determine the root cause of an issue or problem. This is not a foreign concept in healthcare, as it is often used in patient safety studies. So if you haven't involved your patient safety folks in the AAR process, now is a great time to do so!

#### Region 3 Alliance After Action Report-Improvement Plan Template (for non-hospital partners)

[Healthcare Facility \(non hospital\) – After Action Report Improvement Plan Template \(MS Word Template\)](#)

Your organization may use this template to document the response strengths, areas for improvement and the organization's plan for making identified improvements.
